A range of search terms and their synonyms are derived by decomposing RQ1 and RQ2. Boolean operators are used to guide the search within the databases (Table A1 in the Appendix). The returned studies are screened using the inclusion and exclusion criteria to ensure their relevance to the two research questions. A pilot search run was performed to further refine the selection criteria. Harnessing Evidence and Experience to Change Culture: A ... ABSTRACT | Patient and family engaged care (PFEC) is care planned, delivered, managed, and continuously improved in active partnership with patients and their families (or care partners as defined by the patient) to ensure integration of their health and health care goals, preferences, and values. It includes explicit and partnered determination of goals and care options, and it requires ... 4 Reasons Parenting Trauma is Incredibly Difficult ... We were well into the third year of our family's new normal, before I had come to the realization that things really were different for us. That no, all kids really don't do this-whatever "this" may mean at the moment-and that we were not imagining the stress. We were not imagining the frustration. It took nearly four years to accept that the challenges we were facing couldn't simply ... Glossary of research economics - econterms Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
