As such, it must install on an industry standard PC server. Please check VMware's Hardware Compatibility Guide (portal on www.VMware.com web site) for the most up to date list of supported PC servers. Comparison of platform virtualization software - Wikipedia Platform virtualization software, specifically emulators and hypervisors, are software packages that emulate the whole physical computer machine, often providing multiple virtual machines on one physical platform. The table below compares basic information about platform virtualization hypervisors. Hypervisor - Wikipedia A hypervisor or virtual machine monitor (VMM) is computer software, firmware or hardware that creates and runs virtual machines. A computer on which a hypervisor runs one or more virtual machines is called a host machine, and each virtual machine is called a guest machine. The hypervisor presents the guest operating systems with a virtual operating platform and manages the execution of the guest ... AirWatch On-premise vs. AirWatch SaaS | vDestination Migrate to AirWatch Cloud at any time; The Bad. The downside to an on-premise AW deployment is that it's fully on-premise, you're location/building needs to be able to support the power/space/cooling for all of your components, which is likely more than just what is necessary for the AW deployment.
